77 W. Jackson Blvd., (mail code: C - 14J)  
Chicago, IL 60604

**RE: RRG/Clayton Chemical Co. Superfund Site**

As discussed in the generator meeting on December 11, 2001 in Chicago IL, it is Nascote's understanding that the U.S. EPA Region 5 will issue a letter within this week advising that the response time initially defined in the General Notice of Potential Liability Letter for PRP's received December 5, 2001 has been extended. It is further noted that the letter will include a new response date for which Potential Responsible Parties responses are due. Therefore, Nascote will respond in accordance with the revised time period addressed in the extension letter.

If there are any questions, please contact me at (618)327-4381

Sincerely,

**NASCOTE INDUSTRIES, INC.**
